GameHub.io Test Plan

Test Plan 001:

Test Objectives:

Unit Testing – Design Webpage Layout

Test Approach:

Unit Test – Logic Test

Manual or Automated Test:

Manual Test – Will be visually inspecting plans and ideas. Review requirements and expected functionality.

Test Tools:

Manual – clicking, looking, and code inspection with browser dev tools

Test Environment:

David Zarkovacki's Computer

Test Criteria:

Requirement 0.1.1, Design Webpage Layout, Functional Requirement

Test Schedule:

26 Feb, 2026

Test Team:

David Zarkovacki

Test Plan 002:

Test Objectives:

Unit Testing – Design Backend Structure

Test Approach:

Unit Test – Logic Test

Manual or Automated Test:

Manual Test – Will be manually clicking, visually inspecting and comparing code, expected and actual behavior

Test Tools:

looking, and concept inspection,

Test Environment:

Trey Gardner's Computer

Test Criteria:

Requirement 0.1.2, Design Backend Structure, Functional Requirement

Test Schedule:

26 Feb, 2026

Test Team:

Trey Gardner

Test Plan 003:

Test Objectives:

Unit Testing – Design Game Structure

Test Approach:

Unit Test – Logic Test

Manual or Automated Test:

Manual Test – Will be manually clicking, visually inspecting and comparing code, expected and actual behavior

Test Tools:

Manual – clicking, looking, and code inspection with browser dev tools

Test Environment:

Brandon Sith's Computer

Test Criteria:

Requirement 0.1.3, Design Game Structure, Functional Requirement

Test Schedule:

25 Feb, 2026

Test Team:

Brandon Sith

Test Plan 004:

Test Objectives:

Unit Testing – Build Functional Website Navigation

Test Approach:

Unit Test – Logic Test

Manual or Automated Test:

Manual Test – Will be manually clicking, visually inspecting and comparing code, expected and actual behavior

Test Tools:

Manual – clicking, looking, and code inspection with browser dev tools

Test Environment:

David Zarkovacki's Computer

Test Criteria:

Requirement 0.2.1, Build Functional Website Navigation, Functional Requirement

Test Schedule:

02 March, 2026

Test Team:

David Zarkovacki

Test Plan 005:

Test Objectives:

Unit Testing – Build Backend/Data Structures

Test Approach:

Unit Test – Logic Test

Manual or Automated Test:

Manual Test – Will be manually clicking, visually inspecting and comparing code, expected and actual behavior

Test Tools:

Manual – clicking, looking, and code inspection with browser dev tools

Test Environment:

Trey Gardner's Computer

Test Criteria:

Requirement 0.2.2, Build Backend/Data Structures, Functional Requirement

Test Schedule:

02 March, 2026

Test Team:

Trey Gardner

Test Plan 006:

Test Objectives:

Unit Testing – Build Test Game

Test Approach:

Unit Test – Logic Test

Manual or Automated Test:

Manual Test – Will be manually clicking, visually inspecting and comparing code, expected and actual behavior

Test Tools:

Manual – clicking, looking, and code inspection with browser dev tools

Test Environment:

Brandon Sith's Computer

Test Criteria:

Requirement 0.2.3, Build Test Game, Functional Requirement

Test Schedule:

02 March, 2026

Test Team:

Brandon Sith

Test Plan 007:

Test Objectives:

Integration Testing – Build Display Canvas

Test Approach:

Integration Test – Interface Testing

Manual or Automated Test:

Manual Test – Will be manually clicking, visually inspecting and comparing code, expected and actual behavior

Test Tools:

Manual – clicking, looking, and code inspection with browser dev tools

Test Environment:

Brandon Sith's Computer

Test Criteria:

Requirement 0.2.4, Build Display Canvas, Functional Requirement

Test Schedule:

02 March, 2026

Test Team:

Brandon Sith

Test Plan 008:

Test Objectives:

Unit Testing – Design/Build Sign-Up/Sign-In Page Functionality

Test Approach:

Unit Test – Logic Test

Manual or Automated Test:

Manual Test – Will be manually clicking, visually inspecting and comparing code, expected and actual behavior

Test Tools:

Manual – clicking, looking, and code inspection with browser dev tools

Test Environment:

David Zarkovacki's Computer

Test Criteria:

Requirement 1.0.1, Design/Build Sign-Up/Sign-In Page Functionality, Functional Requirement

Test Schedule:

16 March, 2026

Test Team:

David Zarkovacki

Test Plan 009:

Test Objectives:

Integration Testing – Implement User Account Data Pull/Store

Test Approach:

Integration Test – Interface Testing

Manual or Automated Test:

Manual Test – Will be manually clicking, visually inspecting and comparing code, expected and actual behavior

Test Tools:

Manual – clicking, looking, and code inspection with browser dev tools

Test Environment:

Trey Gardner's Computer

Test Criteria:

Requirement 1.0.2, Implement User Account Data Pull/Store, Functional Requirement

Test Schedule:

16 March, 2026

Test Team:

Trey Gardner

Test Plan 010:

Test Objectives:

Integration Testing – Implement User Account Verification (Sign-In)

Test Approach:

Integration Test – Interface Testing

Manual or Automated Test:

Manual Test – Will be manually clicking, visually inspecting and comparing code, expected and actual behavior

Test Tools:

Manual – clicking, looking, and code inspection with browser dev tools

Test Environment:

David Zarkovacki's Computer

Test Criteria:

Requirement 1.0.3, Implement User Account Verification (Sign-In), Functional Requirement

Test Schedule:

16 March, 2026

Test Team:

David Zarkovacki

Test Plan 011:

Test Objectives:

Unit Testing – Design/Build Hangman Game

Test Approach:

Unit Test – Logic Test

Manual or Automated Test:

Manual Test – Will be manually clicking, visually inspecting and comparing code, expected and actual behavior

Test Tools:

Manual – clicking, looking, and code inspection with browser dev tools

Test Environment:

Brandon Sith's Computer

Test Criteria:

Requirement 1.0.4, Design/Build Hangman Game, Functional Requirement

Test Schedule:

16 March, 2026

Test Team:

Brandon Sith

Test Results:

Test Plan 012:

Test Objectives:

Unit Testing – Implement Canvas Display for Hangman

Test Approach:

Unit Test – Logic Test

Manual or Automated Test:

Manual Test – Will be manually clicking, visually inspecting and comparing code, expected and actual behavior

Test Tools:

Manual – clicking, looking, and code inspection with browser dev tools

Test Environment:

Brandon Sith's Computer

Test Criteria:

Requirement 1.0.5, Implement Canvas Display for Hangman, Functional Requirement

Test Schedule:

16 March, 2026

Test Team:

Brandon Sith

Test Plan 013:

Test Objectives:

Integration Testing – Implement Game Score & Account Sync – Hangman

Test Approach:

Integration Test – Interface Testing

Manual or Automated Test:

Manual Test – Will be manually clicking, visually inspecting and comparing code, expected and actual behavior

Test Tools:

Manual – clicking, looking, and code inspection with browser dev tools

Test Environment:

Trey Gardner's Computer

Test Criteria:

Requirement 1.0.6, Implement Game Score & Account Sync – Hangman, Functional Requirement

Test Schedule:

19 April, 2026

Test Team:

Trey Gardner

Test Plan 014:

Test Objectives:

Integration Testing – Implement Page State for Signed-In Accounts

Test Approach:

Integration Test – Interface Testing

Manual or Automated Test:

Manual Test – Will be manually clicking, visually inspecting and comparing code, expected and actual behavior

Test Tools:

Manual – clicking, looking, and code inspection with browser dev tools

Test Environment:

David Zarkovacki's Computer

Test Criteria:

Requirement 1.0.7, Implement Page State for Signed-In Accounts, Functional Requirement

Test Schedule:

19 April, 2026

Test Team:

David Zarkovacki

Test Plan 015:

Test Objectives:

Integration Testing – Implement Live Leaderboard Data

Test Approach:

Integration Test – Interface Testing

Manual or Automated Test:

Manual Test – Will be manually clicking, visually inspecting and comparing code, expected and actual behavior

Test Tools:

Manual – clicking, looking, and code inspection with browser dev tools

Test Environment:

Trey Gardner's Computer

Test Criteria:

Requirement 1.1.1, Implement Live Leaderboard Data, Functional Requirement

Test Schedule:

19 April, 2026

Test Team:

Trey Gardner

Test Plan 016:

Test Objectives:

Unit Testing – Design/Build Snake Game

Test Approach:

Unit Test – Logic Test

Manual or Automated Test:

Manual Test – Will be manually clicking, visually inspecting and comparing code, expected and actual behavior

Test Tools:

Manual – clicking, looking, and code inspection with browser dev tools

Test Environment:

Brandon Sith's Computer

Test Criteria:

Requirement 1.1.2, Design/Build Snake Game, Functional Requirement

Test Schedule:

21 March, 2026

Test Team:

Brandon Sith

Test Plan 017:

Test Objectives:

Integration Testing – Implement Canvas Display for Snake Game

Test Approach:

Integration Test – Interface Testing

Manual or Automated Test:

Manual Test – Will be manually clicking, visually inspecting and comparing code, expected and actual behavior

Test Tools:

Manual – clicking, looking, and code inspection with browser dev tools

Test Environment:

Brandon Sith's Computer

Test Criteria:

Requirement 1.1.3, Implement Canvas Display for Snake Game, Functional Requirement

Test Schedule:

21 March, 2026

Test Team:

Brandon Sith

Test Plan 018:

Test Objectives:

Integration Testing – Implement Game Score & Account Sync – Snake

Test Approach:

Integration Test – Interface Testing

Manual or Automated Test:

Manual Test – Will be manually clicking, visually inspecting and comparing code, expected and actual behavior

Test Tools:

Manual – clicking, looking, and code inspection with browser dev tools

Test Environment:

Trey Gardner's Computer

Test Criteria:

Requirement 1.1.4, Implement Game Score & Account Sync – Snake, Functional Requirement

Test Schedule:

19 April, 2026

Test Team:

Trey Gardner

Test Plan 019:

Test Objectives:

Unit Testing – Implement Dynamic Game Search

Test Approach:

Unit Test – Logic Test

Manual or Automated Test:

Manual Test – Will be manually clicking, visually inspecting and comparing code, expected and actual behavior

Test Tools:

Manual – clicking, looking, and code inspection with browser dev tools

Test Environment:

David Zarkovacki's Computer

Test Criteria:

Requirement 1.2.1, Implement Dynamic Game Search, Functional Requirement

Test Schedule:

06 March, 2026

Test Team:

David Zarkovacki

Test Plan 020:

Test Objectives:

Unit Testing – Design/Build Account Settings Page

Test Approach:

Unit Test – Logic Test

Manual or Automated Test:

Manual Test – Will be manually clicking, visually inspecting and comparing code, expected and actual behavior

Test Tools:

Manual – clicking, looking, and code inspection with browser dev tools

Test Environment:

David Zarkovacki's Computer

Test Criteria:

Requirement 1.2.2, Design/Build Account Settings Page, Functional Requirement

Test Schedule:

06 March, 2026

Test Team:

David Zarkovacki

Test Plan 021:

Test Objectives:

Test Approach:

Unit Test – Logic Test

Manual or Automated Test:

Manual Test – Will be manually clicking, visually inspecting and comparing code, expected and actual behavior

Test Tools:

Manual – clicking, looking, and code inspection with browser dev tools

Test Environment:

David Zarkovacki's Computer

Test Criteria:

Requirement 1.2.3, Design/Build Typing Test Game, Functional Requirement

Test Schedule:

13 April, 2026

Test Team:

David Zarkovacki

Test Plan 022:

Test Objectives:

Integration Testing – Implement Canvas Display for Typing Test

Test Approach:

Integration Test – Interface Testing

Manual or Automated Test:

Manual Test – Will be manually clicking, visually inspecting and comparing code, expected and actual behavior

Test Tools:

Manual – clicking, looking, and code inspection with browser dev tools

Test Environment:

David Zarkovacki's Computer

Test Criteria:

Requirement 1.2.4, Implement Canvas Display for Typing Test, Functional Requirement

Test Schedule:

13 April, 2026

Test Team:

David Zarkovacki

Test Plan 023:

Test Objectives:

Unit Testing – Design/Build Games 5-6

Test Approach:

Unit Test – Logic Test

Manual or Automated Test:

Manual Test – Will be manually clicking, visually inspecting and comparing code, expected and actual behavior

Test Tools:

Manual – clicking, looking, and code inspection with browser dev tools

Test Environment:

Azam Jaffer's Computer

Test Criteria:

Requirement 2.2.1, Design/Build Games 5-6, Functional Requirement

Test Schedule:

TBD

Test Team:

Azam Jaffer

Test Plan 024:

Test Objectives:

Integration Testing – Implement Canvas Display for Games 5-6

Test Approach:

Integration Test – Interface Testing

Manual or Automated Test:

Manual Test – Will be manually clicking, visually inspecting and comparing code, expected and actual behavior

Test Tools:

Manual – clicking, looking, and code inspection with browser dev tools

Test Environment:

David Zarkovacki's Computer

Test Criteria:

Requirement 2.2.2, Implement Canvas Display for Games 5-6, Functional Requirement

Test Schedule:

TBD

Test Team:

David Zarkovacki

Test Plan 025:

Test Objectives:

Integration Testing – Update Leaderboard Data/Dynamic Behavior

Test Approach:

Integration Test – Interface Testing

Manual or Automated Test:

Manual Test – Will be manually clicking, visually inspecting and comparing code, expected and actual behavior

Test Tools:

Manual – clicking, looking, and code inspection with browser dev tools

Test Environment:

Trey Gardner's Computer

Test Criteria:

Requirement 2.2.3, Update Leaderboard Data/Dynamic Behavior, Functional Requirement

Test Schedule:

23 April, 2026

Test Team:

Trey Gardner

Test Plan 026:

Test Objectives:

Integration Testing – Implement Password Reset

Test Approach:

Integration Test – Interface Testing

Manual or Automated Test:

Manual Test – Will be manually clicking, visually inspecting and comparing code, expected and actual behavior

Test Tools:

Manual – clicking, looking, and code inspection with browser dev tools

Test Environment:

David Zarkovacki's Computer

Test Criteria:

Requirement 2.2.4, Implement Password Reset, Functional Requirement

Test Schedule:

TBD

Test Team:

David Zarkovacki

Test Plan 027:

Test Objectives:

Unit Testing – Optimize Snake Game

Test Approach:

Unit Test – Logic Test

Manual or Automated Test:

Manual Test – Will be manually clicking, visually inspecting and comparing code, expected and actual behavior

Test Tools:

Manual – clicking, looking, and code inspection with browser dev tools

Test Environment:

Brandon Sith's Computer

Test Criteria:

Requirement 2.0.1, Optimize Snake Game, Non-Functional Requirement

Test Schedule:

06 April, 2026

Test Team:

Brandon Sith

Test Plan 028:

Test Objectives:

Unit Testing – Optimize Hangman Game

Test Approach:

Unit Test – Logic Test

Manual or Automated Test:

Manual Test – Will be manually clicking, visually inspecting and comparing code, expected and actual behavior

Test Tools:

Manual – clicking, looking, and code inspection with browser dev tools

Test Environment:

Brandon Sith's Computer

Test Criteria:

Requirement 2.0.2, Optimize Hangman Game, Non-Functional Requirement

Test Schedule:

06 April, 2026

Test Team:

Brandon Sith

Test Plan 029:

Test Objectives:

Unit Testing – Optimize Typing Test Game

Test Approach:

Unit Test – Logic Test

Manual or Automated Test:

Manual Test – Will be manually clicking, visually inspecting and comparing code, expected and actual behavior

Test Tools:

Manual – clicking, looking, and code inspection with browser dev tools

Test Environment:

David Zarkovacki's Computer

Test Criteria:

Requirement 2.0.3, Optimize Typing Test Game, Non-Functional Requirement

Test Schedule:

16 April, 2026

Test Team:

David Zarkovacki

Test Plan 030:

Test Objectives:

System Testing – Rework Webpage Design/Animations/Themes

Test Approach:

System Test – Scenario Testing

Manual or Automated Test:

Manual Test – Will be manually clicking, visually inspecting and comparing code, expected and actual behavior

Test Tools:

Manual – clicking, looking, and code inspection with browser dev tools

Test Environment:

David Zarkovacki's Computer

Test Criteria:

Requirement 2.1.1, Rework Webpage Design/Animations/Themes, Non-Functional Requirement

Test Schedule:

19 April, 2026

Test Team:

David Zarkovacki

Test Plan 031:

Test Objectives:

System Testing – Implement Light/Dark Themes for Games

Test Approach:

System Test – Scenario Testing

Manual or Automated Test:

Manual Test – Will be manually clicking, visually inspecting and comparing code, expected and actual behavior

Test Tools:

Manual – clicking, looking, and code inspection with browser dev tools

Test Environment:

Azam Jaffer's Computer

Test Criteria:

Requirement 2.1.2, Implement Light/Dark Themes for Games, Non-Functional Requirement

Test Schedule:

TBD

Test Team:

Azam Jaffer

Test Plan 032:

Test Objectives:

System Testing – Implement User Cache for Auto Log-In

Test Approach:

System Test – Scenario Testing

Manual or Automated Test:

Manual Test – Will be manually clicking, visually inspecting and comparing code, expected and actual behavior

Test Tools:

Manual – clicking, looking, and code inspection with browser dev tools

Test Environment:

Trey Gardner's Computer

Test Criteria:

Requirement 2.1.3, Implement User Cache for Auto Log-In, Non-Functional Requirement

Test Schedule:

11 April, 2026

Test Team:

Trey Gardner

Test Plan 033:

Test Objectives:

Unit Testing – Implement Server Run Multiplayer Game

Test Approach:

Unit Test – Logic Test

Manual or Automated Test:

Manual Test – Will be manually clicking, visually inspecting and comparing code, expected and actual behavior

Test Tools:

Manual – clicking, looking, and code inspection with browser dev tools

Test Environment:

Whole Team's Computer

Test Criteria:

Requirement 3.0.1, Implement Server Run Multiplayer Game, Optional Requirement

Test Schedule:

TBD

Test Team:

Whole Team
